» Profile

Software engineer and Technology Associate at Morgan Stanley, working across full-stack JavaScript/TypeScript and developer-productivity tooling — from static code analysis and internal developer platforms to the build, test and linting infrastructure used across the Firm. Comfortable throughout the stack and the wider ecosystem, with a keen interest in secure software, web performance and the evolving Node.js toolchain.

» Work Experience

- **Morgan Stanley**, London, United Kingdom
Technology Associate & Software Engineer II, November 2022 – Present
Technology Analyst & Software Engineer I, August 2022 – November 2022
 - Led the architecture and development of a static code-analysis tool that flags poor patterns in Node.js projects and shifts their remediation left to development time
 - Built a platform for the JavaScript/TypeScript community to share knowledge on the Firm's internal Stack Overflow, then scaled it to serve every engineering community across the Firm
 - Delivered full-stack tooling for React, Angular and NestJS projects, maintaining harmonised ESLint and Prettier configurations and other developer-productivity tools
 - Built a console shell in C using low-level POSIX system calls — command execution, standard input/output redirection and shell built-ins — during the Analyst programme
- **University of Bristol**, Bristol, United Kingdom
Graduate Teacher & Teaching Assistant, Faculty of Engineering, September 2020 – June 2022
 - Taught C programming and Computer Architecture, and guided students through research and academia in Computer Science
 - Introduced students to software engineering tools such as Git, and helped them navigate ethical frameworks and research platforms
 - Managed two teams of five students, guiding them in prototyping and building a software engineering product
- **Amazon**, London, United Kingdom
Software Development Engineer Intern, June 2021 – September 2021
 - Developed and deployed A/B testing to personalise content on the Prime Video homepage for over 10M people across the US, UK and DE
 - Implemented an internal self-service tool for creating templates and automating manual work for developers and merchandisers
 - Identified three areas of improvement in the software development lifecycle
- **Inductosense**, Bristol, United Kingdom
Software Engineer Intern, June 2020 – September 2020
 - Designed and built highly reusable React components for current and future products
 - Added and updated REST endpoints for communication between the frontend and the backend

» Education

- **University of Bristol**, Bristol, United Kingdom
MEng Computer Science, 2018 – 2022
 - Upper Second-Class Honours (2:1)

- **Colegiul Național “Gheorghe Șincai”**, Bucharest, Romania
Mathematics & Computer Science, 2014 – 2018
 - Romanian Baccalaureate • 9.78/10 overall: 100% Computer Science, 97% Mathematics, 96.5% Romanian • July 2018

» Certifications

- **Developing Secure Software (LFD121)** — The Linux Foundation • 2024

» Projects & Awards

- **1st place** — CSS × Boeing BrishHack, Urban Air Mobility • March 2020
- **1st place** — Scott Logic AI Challenge • March 2019
- **Special Style Award** — University of Bristol CSS Game Jam • November 2020
- **Lights On** — Unity game built for Bristol’s third-year Games Project • 2021
- **Bris-crawl** — web app to organise pub crawls around Bristol (Scott Logic industry project) • 2019
- **Dyson Hackathon** • 2019
- **Hack the Midlands 4.0 Hackathon & CTF** • 2019

» Technical Skills

- **Languages:** JavaScript/TypeScript, Java, C/C++, C#, Go, Python, Scala, Haskell
- **Web & frameworks:** React, Angular, NestJS, Node.js, HTML/CSS
- **Tooling & DevOps:** Git, ESLint, Prettier, Vite, Vitest, Cypress, Playwright, npm, TDD, Agile/Scrum, SQL/SQLite
- **Focus areas:** Developer productivity, static code analysis, secure software, web performance
- **Also:** Unity, Blender, AutoCAD, Adobe Suite • Linux (Ubuntu & Debian), macOS, Windows

» Languages

- Romanian — Native
- English — Native & bilingual proficiency
- French — Professional working proficiency

» Activities & Interests

- 3D printing & laser-cutting design, advanced photo & video editing
- Film and digital photography, archery, basketball, model rocket building, drone flying
